PROJECTS

Feed Me Food Finder

- To provide the user with a random recipe or restaurant
- This application allows the user to get a random recipe if they desire to dine it, or a random restaurant if they want to eat out by utilizing the Spoonacular and Yelp API's in JavaScript.

Weather Dashboard

- To provide the user with weather forecast for the city they input in the search bar.
- Allows the user to search for a city and get the weather forecast for the next 5 days with temperature, humidity, wind speed and UV index displayed by utilizing the Open Weather Map API.
